

ORDERING PROCESS

CABINET SELECTIONS

1

DESIGN YOUR SPACE

Sketch your space with the measurements for walls, windows, and the overall ceiling height from finished floor. Keep in mind how to best achieve the recommended "triangle workspace."

2

SELECT YOUR CABINETS

Make your cabinet selection, including manufacturer, door style, color, and drawer fronts. We have different cabinet lines to explore based on your needs and budget.

3

RECEIVE DESIGN PACKET

We will collect all of your design preferences, along with your layout and appliance measurements, and generate an itemized quote with renderings of the space.

4

REVIEW & REVISE DESIGN

Take a look at the design and review the quote, including the accessory list. If changes are required, communicate the revisions needed to your space. We'll send you an updated packet.

5

BEGIN ORDERING PROCESS

Ready to order your cabinetry? Great! You'll receive a copy of the floor plan when you place a 50% down payment. Confirm all of the cabinet specifications with your installer.

6

FINALIZE ORDERING PROCESS

We will make any final changes to the design based on your installer's review. You'll sign off on the order and it will be submitted. No changes or cancelations can be accepted at this point. We'll share an ETA within 2 - 4 days.

7

CABINETS HAVE ARRIVED

We'll notify you when your cabinets are ready! You can arrange for pick-up when the remaining balance has been paid in full. Job site delivery may be available (subject to manufacturer).
